Research Profile

Medical AI researcher developing efficient, explainable deep learning for medical imaging and biosignals, with a focus on lightweight architectures, segmentation, and rigorous evaluation. Founder of NIMISHES Lab and author of **4 peer-reviewed papers** published or accepted at IEEE and international conferences.

Research Interests

Efficient AI · Medical Image Analysis · Vision-Language Models · Trustworthy & Explainable AI · Biosignals

Education

B.Sc. in Computer Science and Engineering *2020 – 2024*
Ahsanullah University of Science and Technology (AUST)
CGPA: **3.749 / 4.00** • Ranked **7th / 100 (Top 7%)**

Research Experience

Founder & Research Lead — *NIMISHES Lab* *Apr 2026 – Present*

- Founded and lead an independent medical AI research group with reproducible evaluation protocols.
- First-authored lightweight models for EEG sleep staging (83.9% on Sleep-EDF, **3–5× fewer parameters**) [1] and retinopathy grading (QWK 0.884 on APTOS 2019, beating ResNet50 at a fifth of its size) [3].
- First-authored fMRI-privileged, EEG-only decoding via optimal transport (0.801 ROC-AUC) [9] and chest X-ray anonymization (re-identification AUC 0.961 → 0.791 at −0.012 AUROC) [10].
- Co-developed an 11.1M-parameter image-only chest X-ray grounding model (F1 0.302 → 0.338) [8] and lead agentic medical vision work [11], supervised by Dr. Jamil Fayyad (American University of Sharjah).

Remote Research Assistant — *Washington State University* *Jun 2026 – Present*

Project: Anomaly-Aware ForensiBlock *(supervised by Prof. Asma Jodeiri Akbarfam)*

- Contributing to the AI/ML and explainable AI pipeline for a real-time user anomaly detection system.
- Developing anomaly detection and XAI integration for traceable forensic decisions; co-author of [6].

Elite Research Lab — *3 roles* *Dec 2025 – Present*

Research Assistant *Sep 2026 – Present*

Project: LCM-UNet — Reparameterizable Local-Compensated Mamba U-Net *(Joint First Author, [5])*

- Developed the Residual Dilated Local Adapter (RDLA) for sharper boundaries at no extra cost.
- Improved IoU by +0.48 / +0.37 pp on ISIC 2017 / 2018 and reached $86.37 \pm 0.29\%$ IoU on PH^2 with only **34,180 parameters and 0.06 GFLOPs**, under multi-seed and statistical evaluation.

Junior Research Assistant *Mar 2026 – Aug 2026*

Project: BGD-SF PolySegNet — Boundary-Guided Polyp Segmentation *(First Author, [7])*

- Developed boundary-guided multi-scale aggregation, selective skip fusion, and boundary refinement; trained on 3,535 images from three datasets and tested on four external ones.
- Achieved **0.887 Dice and 0.839 IoU**, with +15.7% Boundary F1 and −27.5% HD95 / −34.6% ASSD versus the strongest CNN baselines.

Research Intern *Dec 2025 – Feb 2026*

- Supported medical imaging research through data preprocessing, baseline reproduction, and experiments.

In Preparation

[13] **N. K. Paul**, M. S. I. Shovo, and C. González, "CoMAF-Polyp: Calibrated Reliability-Aware Fusion of Specialist and Foundation Pseudo-Labels for Semi-Supervised Polyp Segmentation," target venue: *Medical Imaging with Deep Learning (MIDL)* 2027.

Industry Experience

Software Engineer I — *Brain Station 23 PLC* *Mar 2025 – Present*

- **OneID** (FastAPI, PostgreSQL, Keycloak): built an eKYC pipeline that cut integration latency by **40%** and a JSONB metadata system that sped up document processing by 35%.
- Added NID validation and normalization that cut invalid submissions by 30%, and secured sensitive identity data with Keycloak.
- **ObhaiVTS** (React, TanStack Query, Zustand): delivered invoice, customer, vehicle, and hub management flows; server-side pagination and dynamic filtering improved data handling by 30%.

Teaching Experience

Adjunct Lecturer, CSE Department — *International Standard University* *Jan 2026 – Present*

- Teaching Robotics, IoT, and Algorithms to about 60 undergraduates and designing hands-on labs.

Competitive Programming Mentor (Remote) — *Shohoj Coding* *Sep 2024 – Dec 2025*

- Mentored 50+ students in graph theory, number theory, and data structures.

Selected Academic Honors

Scholarship for Outstanding Academic Performance (GPA 3.98 / 4.00, ranked 1st / 100) *Fall 2020*
Khondakar Ahmed Muktadir & Mosammat Khodeza Begum Scholarship *Fall 2022*

Technical Skills

Deep Learning Modeling	PyTorch, TensorFlow, Transformers, CLIP, LLaVA, BioViL, Grad-CAM, SHAP CNNs, Vision Transformers, Mamba / state-space models, multimodal fusion, knowledge distillation, optimal transport, calibration, structural reparameterization
Data & Systems	FastAPI, Django, PostgreSQL, MongoDB, Keycloak, Docker, Linux, React
Programming	Python, C++, JavaScript, TypeScript

Additional

Competitive Programming: ICPC Asia Dhaka Regional 2023 (116th) · Intra-AUST 2022 Champion · Codeforces Specialist (max rating 1421, 1000+ problems) · CodeChef (max rating 1570) · LeetCode 500+ solved.

Problem Setter & Judge: AUST CSE Carnival programming contests and Intra-AUST contests (2023 – 2025).
